

Bayonet probe with flat measuring tip

Order nr.: 802210 1011

Bayonet probes are used in process measurement technology, e.g. in the plastics industry. The immersion depth or mounting length can be adjusted to suit the measuring task by means of the rotating bayonet cap. The bayonet lock ensures a secure hold and the threaded rising spring ensures a constant contact pressure. We offer this special probe design as a platinum resistance thermometer or as a thermocouple. The bayonet probes can be manufactured with cable and ferrules or the appropriate connectors.

General Information	
Measuring range	-50 °C to +400 °C depending on sensor type and connection cable
Perm. °C range cable	-50 °C to +400 °C
Accuracy	depending on sensor type
Response time	t63 / t99: information is available on request
Pull-out force	≥ 30 N
Supply and output	
Max. measurement current	max. 1 mA
Supply voltage	approx. 5 V depending on measurement current
Measurement signal	passive (resistance value)
Ambient conditions	
Protection class	IP20 according DIN 60529 (depending on cable)
Humidity and moisture condensation resistance	according to application-specific qualification
Certificates and Standards	
Standards	DIN EN 61326-1:2013 DIN EN IEC 63000:2019-05
Directive	RoHS 2011/65/EU 2014/30/EU
Certificates	Certificate of suitability (on request)

Customizable options

- A - Measuring element
- B - Connection type
- E - Material connection cable
- F - Length connection cable
- G - Connector
- I - Ø bayonet tip
- J - Ø bayonet cap

A - Measuring element				
Code	Sensor	Accuracy / Tolerance resistance	min ²⁾	max ²⁾
A012	Pt100	Cl. B dT = ±(0,30 °C + 0,005 t) ¹⁾	-50 °C	+400 °C
A011	Pt100	Cl. A dT = ±(0,15 °C + 0,002 t) ¹⁾	-50 °C	+300 °C
A013	Pt100	1/3 Cl. B dT = ±(1/3 · (0,30 °C + 0,005 t)) ¹⁾	-50 °C	+200 °C
A014	Pt100	1/10 Cl. B dT = ±(1/10 · (0,30 °C + 0,005 t)) ¹⁾	±0 °C	+100 °C
A032	Pt1000	Cl. B dT = ±(0,30 °C + 0,005 t) ¹⁾	-50 °C	+400 °C
A031	Pt1000	Cl. A dT = ±(0,15 °C + 0,002 t) ¹⁾	-50 °C	+300 °C

¹⁾according to IEC 751 / EN 60751 | ²⁾ Perm. range °C | The measuring range depends on the measuring element and the connecting cable. | Detailed information and the characteristics can be found in our download area.

B - Connection type	
Code	Conn. type
B2	2-Wire (2W)
B3	3-Wire (3W)
B4	4-Wire (4W)

For optimal integration of the bayonet probe into your process, please observe the following installation steps:

(1) Please set the bayonet spring to the desired length and make sure that the spring pressure is sufficiently high. The spring constant may decrease with temperature influence. Therefore, check the contact pressure regularly and readjust if necessary.

(2) Insert the probe tip into the borehole and fix the probe to the bayonet nipple with the bayonet cap. The borehole should be made so that the borehole is approx. 0.2 mm larger than the outer diameter of the probe and that the borehole corresponds to the shape of the probe tip. The borehole must be clean and free of residues (e.g. chips). To optimize heat transfer, we recommend using our thermal paste at temperatures below 200 °C.

(3) For a safe installation, please select the appropriate bayonet nipple from our accessories. Make sure that the process connection thread is suitable for your application.
