

Heat-conducting paste

Article Nr.: 809540 1000

With our heat conduction paste, we can guarantee you effective heat transfer and precise measurement results. For the application, the surfaces must be cleaned and the paste must be applied evenly. You can find the suitable temperature probes and thermocouples in our store.

Technical data	
Volume	10 ml
Thermal conductivity	>2.5 W/mK
Min / Max °C	-30 °C to +280 °C
Thermal resistance	< 0.126 K/W
Scope of delivery	Heat-conducting paste, packed in PE bag
