

Cable probe waterproof with PFA cable

Article no.: 803571 1011

The waterproof cable probe uses a protection sleeve that tapers from a diameter of 6 mm to a diameter of 3 mm. This allows it to be used at smaller measuring points, achieves a waterproof time and is waterproof. (IP67)

To order your cable temperature probe, select the required configuration and send us the order code.

| General Information | |
|---|---|
| Measuring range | -50 °C to +200 °C depending on sensor Type and connection cable |
| Perm. °C range cable | -50 °C to +260 °C |
| Accuracy | depending on sensor Type |
| Response time | t63 / t99: information is available on request |
| Pull-out force | ≥ 30 N |
| Supply and output | |
| Max. meas. current | max. 1 mA |
| Supply voltage | approx. 5 V depending on measurement current |
| Measurement signal | passive (resistance value) |
| Ambient conditions | |
| Protection class | IP67 according DIN 60529 |
| Humidity and moisture condensation resistance | according to application-specific qualification |
| Certificates and Standards | |
| Standards | DIN EN 61326-1:2013 DIN EN IEC 63000:2019-05 |
| Directive | RoHS 2011/65/EU 2014/30/EU |
| Certificates | Certificate of suitability (on request) |

Delivery and Assembly

| | |
|------------------------|--------------------------------------|
| Delivery and Packaging | Probe, separately packaged in PE bag |
|------------------------|--------------------------------------|

Important assembly advices

Installation by means of compression fitting: Please tighten the union nut of the compression fitting by hand as far as it will go (clearly noticeable). For compression fittings with PTFE pressure ring, please make a 1/4 turn with a wrench suitable for the width across flats. These compression fittings can be used several times in this way. In the case of compression fittings with stainless steel cutting ring, the compression fitting connects to the protection tube. This connection is pressure resistant up to 40 bar. However, the compression fitting can only be used once. It must also be tightened more firmly. Please tighten it with 1 3/4 turns.

Mounting by using an immersion sleeve (4): Please note that the Ø and the length of the immersion sleeve must be selected to suit the installation situation so that the minimum immersion depth can be achieved. Since the probe is not inserted directly into the medium, but via the immersion sleeve, the response times are somewhat slower. The probe should be selected in such a way that the protection sleeve touches the bottom of the immersion sleeve and that the air cushion around the protection sleeve is as small as possible. The use of thermal paste can improve the response times. Please lay the cable with reserve loop (4) and in such a way that no water can penetrate the sensor head. This allows you to extend the probe without disconnecting the electrical connection.

Matching accessories: Compression fittings

Compression fitting with PTFE clamping ring

Compression fittings with PTFE clamping ring can be used several times. They are only pressure-tight up to 10 bar. For assembly, please tighten the connecting nut of the compression fitting by hand as far as it will go (clearly noticeable) by hand. With a wrench suitable for the width across flats, please make a 1/4 turn for compression fittings with PTFE pressure ring.
